Andrii Taran
Senior Full Stack Engineer

Instalatorów 5A 31, Warsaw, Mazovia, Poland | **+**48 574082733 | **infodevguy@gmail.com**

Strategic Full Stack Engineer with a dynamic 7+ years of expertise in driving impactful web application development.

Proficient in a versatile technology stack, encompassing Angular, React, Next.js, WordPress, Shopify, Node.js, Express.js, PHP, Laravel, CodeIgniter, C#, and .NET. Adept at swiftly embracing the evolution of programming languages, ensuring seamless integration of cutting-edge features. Recognized for delivering strategic solutions that harmonize with organizational goals and exhibit a consistent commitment to staying at the forefront of technological advancements.

EXPERIENCE

Lead Full Stack Developer (Refuse.com | United States)   05/2022 ~ 08/2023

- o Build a strong team of 11 developers and designers to deliver effective and visually stunning websites to over 6,000 customers. By directly supervising concept models, wireframe, web architecture and web designs, I took organizational skills to the next level and increased customer satisfaction by a whopping 35% by showing the strong problem solving skills.
- o In the realm of Front End Web development, I wielded a customer-specific designing framework, slashing site production time by a remarkable 4 days. But it doesn't stop there my tech toolkit includes Back end development (Laravel 7.2), seamlessly integrating with Twilio API to create a communication bridge between our web application and soft phones.
- o At the heart of our business, our weekly standups not only celebrate success, but are a catalyst for solving problems that arise in identifying and using updated features of new programming languages.

Senior Full Stack Developer (JStreet | United States)   11/2020 ~ 03/2022

- o Led a strong development team of 8 people, coordinating the creation of GitHub repository to provide customers with a direct hosting solution for their repositories. In the cloud infrastructure area, we implemented AWS to create an environment conducive to Agile iteration.
- o Taking on a mentorship role, I guided and expanded the 5 junior front end developer's skills, imparting expertise in JavaScript, WordPress, Shopify, GraphQL, React, and Vue.js also enhanced Back end skills (Node.js, Ruby, PHP, Laravel, Express.js, Azure DevOps).
- o Leveraging my advanced project management skills, I facilitate seamless collaboration with Project Managers, overseeing project's plans and timelines.

Web3 Developer (FatCatCoder | Serbia)   08/2018 ~ 09/2020

- o Championed the integration of the new technologies and software trends to continually enhance and optimize site functionality. The website development and designing were that transform conceptual mockups into dynamic web design & development experiences using the latest in JavaScript frameworks (React.js, Angular, Vue.js), Node.js, MongoDB, MySQL, AJAX, and JSON.
- o Explored the world of Blockchain DApps, contributing expertise to projects such as NFT Marketplaces, Crypto Exchanges, NFT Games, Smart Contracts, and employing technologies like Solidity and Web3.js.

- o With a profound commitment to excellence and the attention to detail, I adeptly responded to user feedback, implementing post-launch patches to improve UI designing and enhance usability.

Front End Internship Developer (Hear.com | Finland)   **06/2017 ~ 07/2018**

- o Architected user-centric interfaces with a blend of modern JavaScript front end frameworks, including Angular Js, complemented front end languages such as HTML, HTML5, CSS and CSS3. As a result, user satisfaction improved by 31%. A diverse team of developers, designers, copywriters, and cross-functional departments (CRO, video, marketing, etc.) collaborated seamlessly with attention to detail.
- o Steered the innovation narrative by providing strategic insights to leadership 3 times a year, ensuring a roadmap aligned with future needs. As a vigilant guardian of efficiency, I ensured the technical feasibility of UI/UX designs, saving over 3,000 hours by steering clear of unproductive design pursuits. My commitment is not just to technology, but to driving impactful user experiences and measurable business success.

EDUCATION

-Warsaw University of Technology**(2015-2017)**
Master of Computer Applications (MCA), Web
Development

-National Technical University of Ukraine "Kyiv
Polytechnic Institute" **(2007-2011)**
Bachelor of Computer Applications, Web development

SKILLS

Hard Skills;

HTML5, CSS3, JavaScript, TypeScript, React.js, Next.js, jQuery, Docker, Angular, Three.js, WordPress, Shopify, PHP, Laravel, Java, C#, .Net, AWS, Google Cloud Platform, Web3, Smart Contract, Solidity, Python, Django, Flask, GitHub, MongoDB, Oracle, MySQL, PostgreSQL, Web Flow, Figma.

Software Skills;

Excellent Verbal Communication Skills, Problem-solving Skills, Flexibility, Teamwork and Integrality
